

Histone H1 Polyclonal Antibody

Catalog No: YT2150

Reactivity: Human; Mouse

Applications: WB;IHC;IF;ELISA

Target: Histone H1

Gene Name: HIST1H1B

Protein Name : Histone H1.5

Human Gene Id: 3009/3007/3008

Human Swiss Prot

No:

P16401/P16402/P10412

Mouse Gene ld: 56702/14957/50709

Immunogen : The antiserum was produced against synthesized peptide derived from human

Histone H1. AA range:1-50

Specificity: Histone H1 Polyclonal Antibody detects endogenous levels of Histone H1

protein.

Formulation : Liquid in PBS containing 50% glycerol, 0.5% BSA and 0.02% sodium azide.

Source: Polyclonal, Rabbit, IgG

Dilution: WB 1:500 - 1:2000. IHC 1:100 - 1:300. IF 1:200 - 1:1000. ELISA: 1:20000. Not

yet tested in other applications.

Purification: The antibody was affinity-purified from rabbit antiserum by affinity-

chromatography using epitope-specific immunogen.

Concentration: 1 mg/ml

Storage Stability: -15°C to -25°C/1 year(Do not lower than -25°C)

1/4

Observed Band: 31 28kD

Cell Pathway : Protein_Acetylation

Background: Histones are basic nuclear proteins responsible for nucleosome structure of the

chromosomal fiber in eukaryotes. Two molecules of each of the four core histones (H2A, H2B, H3, and H4) form an octamer, around which approximately 146 bp of DNA is wrapped in repeating units, called nucleosomes. The linker histone, H1, interacts with linker DNA between nucleosomes and functions in the compaction of chromatin into higher order structures. This gene is intronless and encodes a replication-dependent histone that is a member of the histone H1 family. Transcripts from this gene lack polyA tails but instead contain a palindromic termination element. This gene is found in the small histone gene cluster on

chromosome 6p22-p21.3. [provided by RefSeq, Aug 2015],

Function: function: Histones H1 are necessary for the condensation of nucleosome chains

into higher order structures., similarity: Belongs to the histone H1/H5 family.,

Subcellular Nucleus. Chromosome. According to PubMed:15911621 more commonly found

in heterochromatin. According to PubMed:10997781 associates with actively

transcribed chromatin and not heterochromatin.

Expression: Ubiquitous. Expressed in the majority of the cell lines tested and in testis.

Tag: hot
