

## **IgA Polyclonal Antibody**

Catalog No: YT2281

Reactivity: Human

**Applications:** WB;IHC;IF;ELISA

Target: IgA

Gene Name: IGHA1/IGHA2

Protein Name: Ig alpha-1 chain C region/Ig alpha-2 chain C region

**Human Gene Id:** 3493/3494

**Human Swiss Prot** 

No:

Immunogen: The antiserum was produced against synthesized peptide derived from human

IgA. AA range:227-276

P01876/P01877

**Specificity:** IgA Polyclonal Antibody detects endogenous levels of IgA protein.

**Formulation:** Liquid in PBS containing 50% glycerol, 0.5% BSA and 0.02% sodium azide.

Source: Polyclonal, Rabbit, IgG

**Dilution :** WB 1:500 - 1:2000. IHC 1:100 - 1:300. ELISA: 1:40000.. IF 1:50-200

**Purification:** The antibody was affinity-purified from rabbit antiserum by affinity-

chromatography using epitope-specific immunogen.

**Concentration**: 1 mg/ml

Storage Stability: -15°C to -25°C/1 year(Do not lower than -25°C)

Observed Band: 38kD

**Background:** disease: A chromosomal aberration involving IGHA1 is found in multiple

myeloma (MM) cell lines. Translocation t(1;14)(g21;g32) that forms a

FCRL4-IGHA1 fusion protein.,function:Ig alpha is the major immunoglobulin class in body secretions. It may serve both to defend against local infection and to prevent access of foreign antigens to the general immunologic system.,PTM:3-Hydroxykynurenine, an oxidized tryptophan metabolite that is common in biological fluids, reacts with alpha-1-microglobulin to form heterogeneous polycyclic chromophores including hydroxanthommatin. The chromophore reacts with accessible cysteines forming non-reducible thioether cross-links with Ig alpha-1 chain C region Cys-352.,similarity:Contains 3 Ig-like (immunoglobulin-like) domains.,subunit:Monomeric or polymeric.,

**Function:** 

disease:A chromosomal aberration involving IGHA1 is found in multiple myeloma (MM) cell lines. Subcellular Location:

Secreted . Cell membrane .

**Expression:** Bile, Colon, Mammary gland, Stomach mucosa,

Tag: hot

Sort:

No4: 1

Host: Rabbit

Modifications: Unmodified
