

ENT1 Polyclonal Antibody

Catalog No: YT5031

Reactivity: Human; Mouse; Rat

Applications: WB;ELISA

Target: ENT1

Fields: >>Alcoholism

Gene Name: SLC29A1

Protein Name: Equilibrative nucleoside transporter 1

Q99808

Q9JIM1

Human Gene Id: 2030

Human Swiss Prot

Idiliali Swiss Fiol

No:

Mouse Gene Id: 63959

Mouse Swiss Prot

No:

Rat Gene ld: 63997

Rat Swiss Prot No: O54698

Immunogen: The antiserum was produced against synthesized peptide derived from human

ENT1. AA range:15-64

Specificity: ENT1 Polyclonal Antibody detects endogenous levels of ENT1 protein.

Formulation : Liquid in PBS containing 50% glycerol, 0.5% BSA and 0.02% sodium azide.

Source: Polyclonal, Rabbit, IgG

Dilution: WB 1:500 - 1:2000. ELISA: 1:20000. Not yet tested in other applications.

1/3

Purification: The antibody was affinity-purified from rabbit antiserum by affinity-

chromatography using epitope-specific immunogen.

Concentration: 1 mg/ml

Storage Stability: -15°C to -25°C/1 year(Do not lower than -25°C)

Observed Band: 55kD

Background: This gene is a member of the equilibrative nucleoside transporter family. The

gene encodes a transmembrane glycoprotein that localizes to the plasma and mitochondrial membranes and mediates the cellular uptake of nucleosides from the surrounding medium. The protein is categorized as an equilibrative (as opposed to concentrative) transporter that is sensitive to inhibition by nitrobenzylthioinosine (NBMPR). Nucleoside transporters are required for nucleotide synthesis in cells that lack de novo nucleoside synthesis pathways, and are also necessary for the uptake of cytotoxic nucleosides used for cancer and viral chemotherapies. Multiple alternatively spliced variants, encoding the same protein, have been found for this gene. [provided by RefSeg, Jul 2008].

Function: function: Mediates both influx and efflux of nucleosides across the membrane

(equilibrative transporter). It is sensitive (ES) to low concentrations of the inhibitor nitrobenzylmercaptopurine riboside (NBMPR) and is sodium-independent. It has a higher affinity for adenosine. Inhibited by dipyridamole and dilazep (anticancer chemotherapeutics drugs).,PTM:Glycosylated.,similarity:Belongs to the SLC29A transporter family.,tissue specificity:Expressed in heart, brain, mammary gland,

erythrocytes and placenta, and also in fetal liver and spleen.,

Subcellular Basolateral cell membrane; Multi-pass membrane protein. Apical cell

Location : membrane; Multi-pass membrane protein. Cell membrane; Multi-pass membrane

protein. Predominantly localized in the basolateral membrane in polarized MDCK

cells.

Expression : Detected in erythrocytes (at protein level). Expressed in heart, brain, mammary

gland, erythrocytes and placenta, and also in fetal liver and spleen.

Tag: hot

Sort : 5568

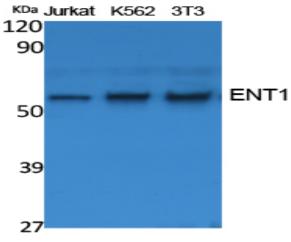

No4: 1

Host: Rabbit

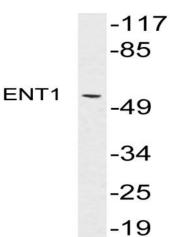

Modifications: Unmodified

Western Blot analysis of extracts from Jurkat, K562, NIH-3T3 cells, using ENT1 Polyclonal Antibody. Antibody was diluted at 1:2000. Secondary antibody(catalog#:RS0002) was diluted at 1:20000

Western blot analysis of lysates from MDA-MB-435 cells, using ENT1 antibody.
