

Smad3 (phospho Ser213) Polyclonal Antibody

Catalog No: YP0364

Reactivity: Human; Mouse; Rat

Applications: WB;IHC;IF;ELISA

Target: Smad3

Fields: >>FoxO signaling pathway;>>Cell cycle;>>Endocytosis;>>Cellular

senescence;>>Wnt signaling pathway;>>TGF-beta signaling pathway;>>Apelin signaling pathway;>>Hippo signaling pathway;>>Adherens junction;>>Signaling pathways regulating pluripotency of stem cells;>>Th17 cell differentiation;>>AGE-RAGE signaling pathway in diabetic complications;>>Hepatitis B;>>Human T-cell

leukemia virus 1 infection;>>Pathways in cancer;>>Colorectal

cancer;>>Pancreatic cancer;>>Chronic myeloid leukemia;>>Hepatocellular carcinoma;>>Gastric cancer;>>Inflammatory bowel disease;>>Diabetic

cardiomyopathy

Gene Name: SMAD3

Protein Name: Mothers against decapentaplegic homolog 3

P84022

Q8BUN5

Human Gene ld: 4088

Human Swiss Prot

No:

Mouse Gene Id: 17127

Mouse Swiss Prot

No:

Rat Gene ld: 25631

Rat Swiss Prot No: P84025

Immunogen: The antiserum was produced against synthesized peptide derived from human

Smad3 around the phosphorylation site of Ser213. AA range:179-228

Specificity: Phospho-Smad3 (S213) Polyclonal Antibody detects endogenous levels of

Smad3 protein only when phosphorylated at S213.

Liquid in PBS containing 50% glycerol, 0.5% BSA and 0.02% sodium azide. Formulation:

Source: Polyclonal, Rabbit, IgG

Dilution: WB 1:500 - 1:2000. IHC 1:100 - 1:300. ELISA: 1:5000.. IF 1:50-200

Purification: The antibody was affinity-purified from rabbit antiserum by affinity-

chromatography using epitope-specific immunogen.

Concentration: 1 mg/ml

Storage Stability: -15°C to -25°C/1 year(Do not lower than -25°C)

Observed Band: 48kD

Cell_Cycle_G1S;Cell_Cycle_G2M_DNA;WNT;WNT-T CELLTGF-**Cell Pathway:**

beta; Adherens Junction; Pathways in cancer; Colorectal cancer; Pancreatic

cancer; Chronic myeloid leukemia;

The protein encoded by this gene belongs to the SMAD, a family of proteins **Background:**

similar to the gene products of the Drosophila gene & apos; mothers against decapentaplegic' (Mad) and the C. elegans gene Sma. SMAD proteins are signal transducers and transcriptional modulators that mediate multiple signaling pathways. This protein functions as a transcriptional modulator activated by transforming growth factor-beta and is thought to play a role in the regulation of

carcinogenesis. [provided by RefSeq, Apr 2009],

Function: disease:Defects in SMAD3 may be a cause of colorectal cancer (CRC)

> [MIM:114500]..domain:The MH2 domain is sufficient to carry protein nuclear export., function: Transcriptional modulator activated by TGF-beta (transforming growth factor) and activin type 1 receptor kinase. SMAD3 is a receptor-regulated SMAD (R-SMAD)., PTM: Phosphorylated on serine by TGF-beta and activin type 1

receptor kinases., similarity: Belongs to the dwarfin/SMAD

family., similarity: Contains 1 MH1 (MAD homology 1) domain., similarity: Contains 1 MH2 (MAD homology 2) domain., subcellular location: In the cytoplasm in the

absence of ligand. Migration to the nucleus when complexed with

Smad4., subunit: Interacts with HGS. Interacts with NEDD4L in response to TGFbeta. Interacts with TTRAP (By similarity). Interacts with SARA (SMAD anchor for receptor activation); form trimers with another SMAD3 and the co-SMAD SMAD4.

Interacts wit

Subcellular Location:

Cytoplasm . Nucleus . Cytoplasmic and nuclear in the absence of TGF-beta. On TGF-beta stimulation, migrates to the nucleus when complexed with SMAD4 (PubMed:15799969, PubMed:21145499). Through the action of the phosphatase PPM1A, released from the SMAD2/SMAD4 complex, and exported out of the nucleus by interaction with RANBP1 (PubMed:16751101, PubMed:19289081). Co-localizes with LEMD3 at the nucleus inner membrane (PubMed:15601644).

MAPK-mediated phosphorylation appears to have no effect on nuclear import (PubMed:19218245). PDPK1 prevents its nuclear translocation in response to TGF-beta (PubMed:17327236). Localized mainly to the nucleus in the early stages of embryo development with expression becoming evident in the cytoplasm of the inner cell mass at the blastocyst stage (By similarity)

Expression: Brain, Colon carcinoma, Esophagus tumor, Pancreas, Placenta, Spleen, Umbilical

cord blood

Sort : 16408

No4: 1

Host: Rabbit

Modifications: Phospho
