

CRMP-2 (phospho Ser522) Polyclonal Antibody

YP0513 Catalog No:

Human; Mouse; Rat Reactivity:

Applications: WB;ELISA

Target: CRMP-2

Fields: >>Axon guidance

Gene Name: DPYSL2

Protein Name: Dihydropyrimidinase-related protein 2

Q16555

O08553

Human Gene Id: 1808

Human Swiss Prot

No:

Mouse Gene Id: 12934

Mouse Swiss Prot

No:

Rat Gene Id: 25416

P47942 **Rat Swiss Prot No:**

Synthesized phospho-peptide around the phosphorylation site of human Immunogen:

CRMP-2 (phospho Ser522)

Specificity: Phospho-CRMP-2 (S522) Polyclonal Antibody detects endogenous levels of

CRMP-2 protein only when phosphorylated at S522.

Formulation: Liquid in PBS containing 50% glycerol, 0.5% BSA and 0.02% sodium azide.

Source: Polyclonal, Rabbit, IgG

Dilution: WB 1:500 - 1:2000. ELISA: 1:10000. Not yet tested in other applications.

1/3

The antibody was affinity-purified from rabbit antiserum by affinity-**Purification:**

chromatography using epitope-specific immunogen.

Concentration: 1 mg/ml

Storage Stability: -15°C to -25°C/1 year(Do not lower than -25°C)

62kD **Observed Band:**

Cell Pathway: Axon guidance;

This gene encodes a member of the collapsin response mediator protein family. **Background:**

> Collapsin response mediator proteins form homo- and hetero-tetramers and facilitate neuron guidance, growth and polarity. The encoded protein promotes microtubule assembly and is required for Sema3A-mediated growth cone collapse, and also plays a role in synaptic signaling through interactions with calcium channels. This gene has been implicated in multiple neurological disorders, and hyperphosphorylation of the encoded protein may play a key role in the development of Alzheimer's disease. Alternatively spliced transcript

variants encoding multiple isoforms have been observed for this gene. [provided

by RefSeq, Sep 2011],

Function: function: Necessary for signaling by class 3 semaphorins and subsequent

remodeling of the cytoskeleton. Plays a role in axon guidance, neuronal growth cone collapse and cell migration.,PTM:3F4, a monoclonal antibody which strongly stains neurofibrillary tangles in Alzheimer disease brains, specifically labels

DPYSL2 when phosphorylated on Ser-518, Ser-522 and

Thr-509., similarity: Belongs to the DHOase family.

Hydantoinase/dihydropyrimidinase subfamily., subunit: Homotetramer, and heterotetramer with CRMP1, DPYSL3, DPYSL4 or DPYSL5 (By similarity). Interacts through its C-terminus with the C-terminus of CYFIP1/SRA1. Interacts

with HTR4.,tissue specificity:Ubiquitous.,

Cytoplasm, cytosol . Cytoplasm, cytoskeleton . Membrane . Tightly but non-Subcellular Location:

covalently associated with membranes.

Ubiquitous. **Expression:**

Tag: hot

Sort: 4581

No4:

Host: Rabbit

Modifications:

Phospho
