

## CD43 (ABT-CD43) IHC kit

Catalog No: IHCM6154

**Reactivity:** Human;

**Applications:** IHC

Target: CD43

Fields: >>Cell adhesion molecules

Gene Name: SPN CD43

Protein Name: Leukosialin (Galactoglycoprotein) (GALGP) (Leukocyte sialoglycoprotein)

(Sialophorin) (CD antigen CD43)

Human Gene Id: 6693

**Human Swiss Prot** 

No:

Immunogen: Synthesized peptide derived from human CD43 AA range: 300-400

**Specificity:** The antibody can specifically recognize human CD43 protein.

**Source:** Mouse, Monoclonal/IgG1, kappa

P16150

**Purification:** The antibody was affinity-purified from ascites by affinity-chromatography using

specific immunogen.

Storage Stability: 2°C to 8°C/1 year

**Cell Pathway:** Cell adhesion molecules (CAMs);

**Background:** The protein encoded by this gene is a major sialoglycoprotein found on the

surface of thymocytes, T lymphocytes, monocytes, granulocytes, and some B lymphocytes. It may be part of a physiologic ligand-receptor complex involved in T-cell activation. During T-cell activation, this protein is actively removed from the T-cell-APC (antigen-presenting cell) contact site, suggesting a negative regulatory

role in adaptive immune response. [provided by RefSeq, Sep 2011],

1/4

## **Function:**

disease:CD43 expression is defective on the T-cells of males with the immunodeficiency Wiskott-Aldrich syndrome. Affected males are susceptible to opportunistic infections and do not respond to polysaccharide antigens, reflecting defects in cytotoxic and helper T-cell functions.,function:One of the major glycoproteins of thymocytes and T lymphocytes. Plays a role in the physicochemical properties of the T-cell surface and in lectin binding. Presents carbohydrate ligands to selectins. Has an extended rodlike structure that could protrude above the glycocalyx of the cell and allow multiple glycan chains to be accessible for binding. Is a counter receptor for SN/Siglec-1 (By similarity). During T-cell activation is actively removed from the T-cell-APC (antigen-presenting cell) contact site thus suggesting a negative regulatory role in adaptive immune response.,PTM:Glycosylated; has a high c

Subcellular Location:

Membranous

**Expression:** 

Cell surface of thymocytes, T-lymphocytes, neutrophils, plasma cells and

myelomas.

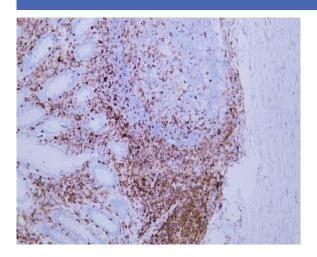

Tag:

hot

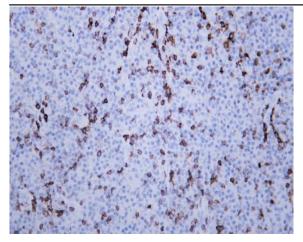

Sort:

3583

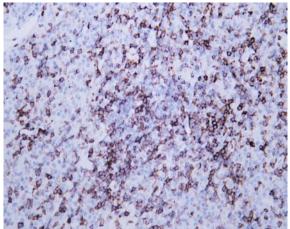

## **Products Images**

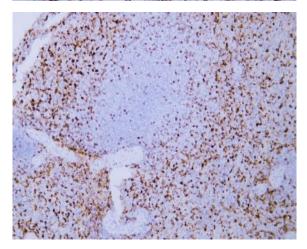

Human appendix tissue was stained with Anti-CD43 (ABT-CD43) Antibody

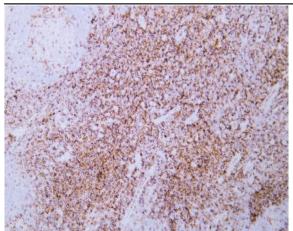

Human lymphoma tissue was stained with Anti-CD43 (ABT-CD43) Antibody

Human lymphoma tissue was stained with Anti-CD43 (ABT-CD43) Antibody

Human spleen tissue was stained with Anti-CD43 (ABT-CD43) Antibody

Human tonsil tissue was stained with Anti-CD43 (ABT-CD43) Antibody
