

**Adducin  $\alpha/\beta$  Polyclonal Antibody**

<b>Catalog No :</b>	YT0125
<b>Reactivity :</b>	Human;Mouse;Rat
<b>Applications :</b>	WB;IHC;IP;IF;ELISA
<b>Target :</b>	Adducin $\alpha/\beta$
<b>Gene Name :</b>	ADD1/ADD2
<b>Protein Name :</b>	Alpha-adducin/Beta-adducin
<b>Human Gene Id :</b>	118/119
<b>Human Swiss Prot No :</b>	P35611/P35612
<b>Mouse Gene Id :</b>	11518/11519
<b>Rat Gene Id :</b>	24170/24171
<b>Rat Swiss Prot No :</b>	Q63028/Q05764
<b>Immunogen :</b>	The antiserum was produced against synthesized peptide derived from human ADD1. AA range:688-737
<b>Specificity :</b>	Adducin $\alpha/\beta$ Polyclonal Antibody detects endogenous levels of Adducin $\alpha/\beta$ protein.
<b>Formulation :</b>	Liquid in PBS containing 50% glycerol, 0.5% BSA and 0.02% sodium azide.
<b>Source :</b>	Polyclonal, Rabbit,IgG
<b>Dilution :</b>	WB 1:500 - 1:2000. IHC 1:100 - 1:300. Immunoprecipitation: 2-5 ug:mg lysate. IF 1:200 - 1:1000. ELISA: 1:40000. Not yet tested in other applications.
<b>Purification :</b>	The antibody was affinity-purified from rabbit antiserum by affinity-chromatography using epitope-specific immunogen.

**Concentration :** 1 mg/ml

---

**Storage Stability :** -15°C to -25°C/1 year(Do not lower than -25°C)

---

**Observed Band :** 80kD

---

**Background :**

adducin 1 (ADD1) Homo sapiens Adducins are a family of cytoskeleton proteins encoded by three genes (alpha, beta, gamma). Adducin is a heterodimeric protein that consists of related subunits, which are produced from distinct genes but share a similar structure. Alpha- and beta-adducin include a protease-resistant N-terminal region and a protease-sensitive, hydrophilic C-terminal region. Alpha- and gamma-adducins are ubiquitously expressed. In contrast, beta-adducin is expressed at high levels in brain and hematopoietic tissues. Adducin binds with high affinity to Ca(2+)/calmodulin and is a substrate for protein kinases A and C. Alternative splicing results in multiple variants encoding distinct isoforms; however, not all variants have been fully described. [provided by RefSeq, Jul 2008],

---

**Function :**

alternative products:Additional isoforms seem to exist,domain:Each subunit is comprised of three regions: a NH2-terminal protease-resistant globular head region, a short connecting subdomain, and a protease-sensitive tail region.,function:Membrane-cytoskeleton-associated protein that promotes the assembly of the spectrin-actin network. Binds to calmodulin.,PTM:The N-terminus is blocked.,similarity:Belongs to the aldolase class II family. Adducin subfamily.,subunit:Heterodimer of an alpha and a beta subunit or an alpha and a gamma subunit. Binds ROCK1.,tissue specificity:Expressed in all tissues. Found in much higher levels in reticulocytes than the beta subunit.,

---

**Subcellular Location :** Cytoplasm, cytoskeleton. Cell membrane; Peripheral membrane protein; Cytoplasmic side.

---

**Expression :** Expressed in all tissues. Found in much higher levels in reticulocytes than the beta subunit.

---
