

Olfactory receptor 13F1 Polyclonal Antibody

YT3277 Catalog No:

Reactivity: Human;Rat;Mouse;

WB;IF;ELISA **Applications:**

Olfactory receptor 13F1 **Target:**

Fields: >>Olfactory transduction

Gene Name: **OR13F1**

Protein Name: Olfactory receptor 13F1

Q8NGS4

Human Gene Id: 138805

Human Swiss Prot

Immunogen:

No:

The antiserum was produced against synthesized peptide derived from human

OR13F1. AA range:241-290

Olfactory receptor 13F1 Polyclonal Antibody detects endogenous levels of **Specificity:**

Olfactory receptor 13F1 protein.

Liquid in PBS containing 50% glycerol, 0.5% BSA and 0.02% sodium azide. Formulation:

Source: Polyclonal, Rabbit, IgG

Dilution: WB 1:500 - 1:2000. IF 1:200 - 1:1000. ELISA: 1:20000. Not yet tested in other

applications.

Purification: The antibody was affinity-purified from rabbit antiserum by affinity-

chromatography using epitope-specific immunogen.

Concentration: 1 mg/ml

Storage Stability: -15°C to -25°C/1 year(Do not lower than -25°C)

1/2

Observed Band: 34kD

Cell Pathway : Olfactory transduction;

Background:

Olfactory receptors interact with odorant molecules in the nose, to initiate a neuronal response that triggers the perception of a smell. The olfactory receptor proteins are members of a large family of G-protein-coupled receptors (GPCR) arising from single coding-exon genes. Olfactory receptors share a 7-transmembrane domain structure with many neurotransmitter and hormone receptors and are responsible for the recognition and G protein-mediated transduction of odorant signals. The olfactory receptor gene family is the largest in the genome. The nomenclature assigned to the olfactory receptor genes and proteins for this organism is independent of other organisms. [provided by RefSeq, Jul 2008],

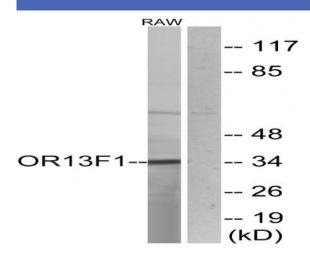

Function:

function:Odorant receptor ., similarity:Belongs to the G-protein coupled receptor 1 family.,

Subcellular Location:

Cell membrane; Multi-pass membrane protein.
