

Olfactory receptor 7E5P Polyclonal Antibody

Catalog No: YT3437

Reactivity: Human; Rat; Mouse;

Applications: WB;IF;ELISA

Target: Olfactory receptor 7E5P

Gene Name: OR7E5P

Protein Name: Seven transmembrane helix receptor

Q96N54

Human Gene Id: 219445

Human Swiss Prot

No:

Immunogen: The antiserum was produced against synthesized peptide derived from human

OR7E5P. AA range:35-84

Specificity: Olfactory receptor 7E5P Polyclonal Antibody detects endogenous levels of

Olfactory receptor 7E5P protein.

Formulation : Liquid in PBS containing 50% glycerol, 0.5% BSA and 0.02% sodium azide.

Source: Polyclonal, Rabbit, IgG

Dilution: WB 1:500 - 1:2000. IF 1:200 - 1:1000. ELISA: 1:10000. Not yet tested in other

applications.

Purification: The antibody was affinity-purified from rabbit antiserum by affinity-

chromatography using epitope-specific immunogen.

Concentration: 1 mg/ml

Storage Stability: -15°C to -25°C/1 year(Do not lower than -25°C)

Observed Band: 26kD

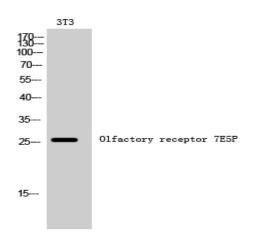

1/3

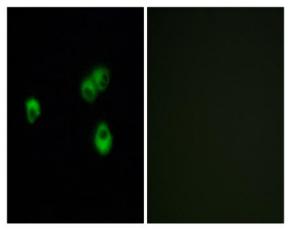

Background:

Olfactory receptors interact with odorant molecules in the nose, to initiate a neuronal response that triggers the perception of a smell. The olfactory receptor proteins are members of a large family of G-protein-coupled receptors (GPCR) arising from single coding-exon genes. Olfactory receptors share a 7-transmembrane domain structure with many neurotransmitter and hormone receptors and are responsible for the recognition and G protein-mediated transduction of odorant signals. The olfactory receptor gene family is the largest in the genome. The nomenclature assigned to the olfactory receptor genes and proteins for this organism is independent of other organisms. This family member is believed to be a pseudogene.
