

Fabp1 rabbit pAb

Catalog No: YT7970

Reactivity: Human; Rat; Mouse;

Applications: WB;ELISA

Target: Fabp1

Fields: >>PPAR signaling pathway;>>Alcoholic liver disease;>>Fat digestion and

absorption

P07148

P12710

Gene Name: FABP1 FABPL

Protein Name: Fabp1

Human Gene Id: 2168

Human Swiss Prot

No:

Mouse Gene Id: 14080

Mouse Swiss Prot

No:

Rat Gene Id: 24360

Rat Swiss Prot No: P02692

Immunogen: Synthesized peptide derived from human Fabp1

Specificity: This antibody detects endogenous levels of Human Fabp1

Formulation : Liquid in PBS containing 50% glycerol, 0.5% BSA and 0.02% sodium azide.

Source: Polyclonal, Rabbit, IgG

Dilution: WB 1:1000-2000 ELISA 1:5000-20000

1/2

Purification: The antibody was affinity-purified from rabbit antiserum by affinity-

chromatography using epitope-specific immunogen.

Concentration: 1 mg/ml

Storage Stability: -15°C to -25°C/1 year(Do not lower than -25°C)

Molecularweight: 14kD

Background: This gene encodes the fatty acid binding protein found in liver. Fatty acid binding

proteins are a family of small, highly conserved, cytoplasmic proteins that bind long-chain fatty acids and other hydrophobic ligands. This protein and FABP6 (the ileal fatty acid binding protein) are also able to bind bile acids. It is thought that FABPs roles include fatty acid uptake, transport, and metabolism. [provided

by RefSeq, Mar 2011],

Function: domain:Forms a beta-barrel structure that accommodates hydrophobic ligands

in its interior., function: Binds free fatty acids and their coenzyme A derivatives, bilirubin, and some other small molecules in the cytoplasm. May be involved in intracellular lipid transport., similarity: Belongs to the calycin superfamily. Fatty-

acid binding protein (FABP) family.,

Subcellular Location:

Cytoplasm.
