

## c-Src (phospho Ser75) Polyclonal Antibody

| Catalog No :             | YP0798   |
|--------------------------|--|
| Reactivity :             | Human;Mouse;Rat  |
| Applications :           | WB;IHC;IF;ELISA  |
| Target :                 | c-Src  |
| Fields :                 | >>EGFR tyrosine kinase inhibitor resistance;>>Endocrine resistance;>>ErbB<br>signaling pathway;>>Rap1 signaling pathway;>>Chemokine signaling<br>pathway;>>Mitophagy - animal;>>Endocytosis;>>Axon guidance;>>VEGF<br>signaling pathway;>>Focal adhesion;>>Adherens junction;>>Tight<br>junction;>>Gap junction;>>Platelet activation;>>Neutrophil extracellular trap<br>formation;>>C-type lectin receptor signaling pathway;>>GABAergic<br>synapse;>>Inflammatory mediator regulation of TRP channels;>>Regulation of<br>actin cytoskeleton;>>GnRH signaling pathway;>>Estrogen signaling<br>pathway;>>Prolactin signaling pathway;>>Thyroid hormone signaling<br>pathway;>>Oxytocin signaling pathway;>>Relaxin signaling pathway;>>Bacterial<br>invasion of epithelial cells;>>Epithelial cell signaling in Helicobacter pylori<br>infection;>>Pathogenic Escherichia coli infection;>>Shigellosis;>>Yersinia<br>infection;>>Tuberculosis;>>Hepatitis B;>>Human cytomegalovirus<br>infection;>>Kaposi sarcoma-associated herpesvirus infection;>>Herpes simplex<br>virus 1 inf |
| Gene Name :              | SRC  |
| Protein Name :           | Proto-oncogene tyrosine-protein kinase Src   |
| Human Gene Id :          | 6714   |
| Human Swiss Prot<br>No : | P12931   |
| Mouse Gene Id :          | 20779  |
| Mouse Swiss Prot<br>No : | P05480   |
| Rat Swiss Prot No :      | Q9WUD9   |
| Immunogen :              | The antiserum was produced against synthesized peptide derived from human Src around the phosphorylation site of Ser75. AA range:41-90   |

| Best Tools for Immunology Research |  |
|------------------------------------|--|
| Specificity :                      | Phospho-c-Src (S75) Polyclonal Antibody detects endogenous levels of c-Src protein only when phosphorylated at S75.  |
| Formulation :                      | Liquid in PBS containing 50% glycerol, 0.5% BSA and 0.02% sodium azide.  |
| Source :                           | Polyclonal, Rabbit,IgG   |
| Dilution :                         | WB 1:500 - 1:2000. IHC 1:100 - 1:300. ELISA: 1:5000 IF 1:50-200  |
| Purification :                     | The antibody was affinity-purified from rabbit antiserum by affinity-<br>chromatography using epitope-specific immunogen.  |
| Concentration :                    | 1 mg/ml  |
| Storage Stability :                | -15°C to -25°C/1 year(Do not lower than -25°C)   |
| Observed Band :                    | 60kD   |
| Cell Pathway :                     | ErbB_HER;Endocytosis;VEGF;Focal<br>adhesion;Adherens_Junction;Adherens_Junction;Gap junction;GnRH;Epithelial<br>cell signaling in Helicobacter pylori infection;   |
| Background :                       | This gene is highly similar to the v-src gene of Rous sarcoma virus. This proto-<br>oncogene may play a role in the regulation of embryonic development and cell<br>growth. The protein encoded by this gene is a tyrosine-protein kinase whose<br>activity can be inhibited by phosphorylation by c-SRC kinase. Mutations in this<br>gene could be involved in the malignant progression of colon cancer. Two<br>transcript variants encoding the same protein have been found for this gene.<br>[provided by RefSeq, Jul 2008],  |
| Function :                         | catalytic activity:ATP + a [protein]-L-tyrosine = ADP + a [protein]-L-tyrosine<br>phosphate.,PTM:Phosphorylated on Tyr-530 by c-Src kinase (CSK). The<br>phosphorylated form is termed pp60c-src. The phosphorylated tail interacts with<br>the SH2 domain thereby repressing kinase activity.,similarity:Belongs to the<br>protein kinase superfamily. Tyr protein kinase family. SRC<br>subfamily.,similarity:Contains 1 protein kinase domain.,similarity:Contains 1 SH2<br>domain.,similarity:Contains 1 SH3 domain.,subunit:Interacts with DDEF1/ASAP1;<br>via the SH3 domain. Interacts with CCPG1 (By similarity). Interacts with CDCP1,<br>PELP1, TGFB1I1 and TOM1L2. Interacts with the cytoplasmic domain of MUC1,<br>phosphorylates it and increases binding of MUC1 with beta-catenin. Interacts with<br>RALGPS1; via the SH3 domain. Interacts with HEV ORF3 protein; via the SH3<br>domain., |
| Subcellular<br>Location :          | Cell membrane ; Lipid-anchor . Mitochondrion inner membrane . Nucleus .<br>Cytoplasm, cytoskeleton . Cytoplasm, perinuclear region . Cell junction, focal<br>adhesion . Localizes to focal adhesion sites following integrin engagement  |

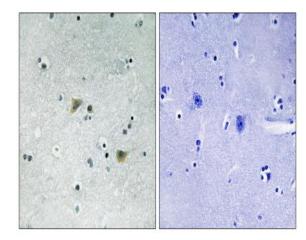

(PubMed:22801373). Localization to focal adhesion sites requires myristoylation and the SH3 domain (PubMed:7525268). Colocalizes with PDLIM4 at the perinuclear region, but not at focal adhesions (PubMed:19307596).

## **Expression**:

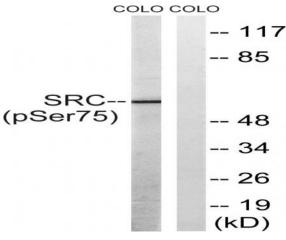

Expressed ubiquitously. Platelets, neurons and osteoclasts express 5-fold to 200-fold higher levels than most other tissues.; [Isoform 1]: Expressed in spleen and liver.; [Isoform 2]: Expressed in brain.; [Isoform 3]: Expressed in brain.

## COLO Western Blot analys 138-Polyclonal Antibody 138-P-c-Src (S75) 15-EGF

Western Blot analysis of COLO cells using Phospho-c-Src (S75) Polyclonal Antibody diluted at 1:1000

Immunohistochemistry analysis of paraffin-embedded human brain, using Src (Phospho-Ser75) Antibody. The picture on the right is blocked with the phospho peptide.

Western blot analysis of lysates from COLO205 cells treated with EGF 200ng/ml 30', using Src (Phospho-Ser75) Antibody. The lane on the right is blocked with the phospho peptide.
