

IGF-IR (phospho Tyr1346) Polyclonal Antibody

Catalog No: YP1027

Reactivity: Human; Mouse; Rat

Applications: IHC;IF;ELISA

Target: IGF-1R

Fields: >>EGFR tyrosine kinase inhibitor resistance;>>Endocrine resistance;>>MAPK

signaling pathway;>>Ras signaling pathway;>>Rap1 signaling pathway;>>HIF-1 signaling pathway;>>FoxO signaling pathway;>>Oocyte meiosis;>>Autophagy -

animal;>>Endocytosis;>>mTOR signaling pathway;>>PI3K-Akt signaling pathway;>>AMPK signaling pathway;>>Longevity regulating

pathway;>>Longevity regulating pathway - multiple species;>>Focal

adhesion;>>Adherens junction;>>Signaling pathways regulating pluripotency of stem cells;>>Long-term depression;>>Ovarian steroidogenesis;>>Progesterone-

mediated oocyte maturation;>>Pathways in cancer;>>Transcriptional misregulation in cancer;>>Proteoglycans in cancer;>>Glioma;>>Prostate cancer;>>Melanoma;>>Breast cancer;>>Hepatocellular carcinoma

Gene Name: IGF1R

Protein Name: Insulin-like growth factor 1 receptor

P08069

Human Gene Id: 3480

Human Swiss Prot

No:

Mouse Gene ld: 16001

Mouse Swiss Prot

t Q60751

No:

Rat Gene ld: 25718

Rat Swiss Prot No: P24062

Immunogen: The antiserum was produced against synthesized peptide derived from human

IGF1R around the phosphorylation site of Tyr1346. AA range:1311-1360

Specificity: Phospho-IGF-IR (Y1346) Polyclonal Antibody detects endogenous levels of IGF-

IR protein only when phosphorylated at Y1346.

Formulation: Liquid in PBS containing 50% glycerol, 0.5% BSA and 0.02% sodium azide.

Source: Polyclonal, Rabbit, IgG

Dilution: IHC 1:100 - 1:300. ELISA: 1:40000.. IF 1:50-200

Purification: The antibody was affinity-purified from rabbit antiserum by affinity-

chromatography using epitope-specific immunogen.

Concentration: 1 mg/ml

Storage Stability: -15°C to -25°C/1 year(Do not lower than -25°C)

Molecularweight: 155kD

Observed Band: pro: 155kD, recetor beta: 95kD

Cell Pathway: Oocyte meiosis;Endocytosis;Focal adhesion;Adherens_Junction;Long-term

depression;Progesterone-mediated oocyte maturation;Pathways in cancer;Colorectal cancer;Glioma;Prostate cancer;Melanoma;

Background: This receptor binds insulin-like growth factor with a high affinity. It has tyrosine

kinase activity. The insulin-like growth factor I receptor plays a critical role in transformation events. Cleavage of the precursor generates alpha and beta subunits. It is highly overexpressed in most malignant tissues where it functions as an anti-apoptotic agent by enhancing cell survival. Alternatively spliced transcript variants encoding distinct isoforms have been found for this gene.

[provided by RefSeg, May 2014],

Function: catalytic activity:ATP + a [protein]-L-tyrosine = ADP + a [protein]-L-tyrosine

phosphate., disease: Defects in IGF1R may be a cause in some cases of

resistance to insulin-like growth factor 1 (IGF1 resistance) [MIM:270450]. IGF1 resistance is a gowth deficiency disorder characterized by intrauterine growth retardation and poor postnatal growth accompanied with increased plasma

IGF1.,enzyme regulation:Autophosphorylation activates the kinase

activity.,function:This receptor binds insulin-like growth factor 1 (IGF1) with a high affinity and IGF2 with a lower affinity. It has a tyrosine-protein kinase activity, which is necessary for the activation of the IGF1-stimulated downstream signaling

cascade. When present in a hybrid receptor with INSR, binds IGF1.

PubMed:12138094 shows that hybrid receptors composed of IGF1R and INSR

isoform Long are activated with a high affinity by IGF1, with low a

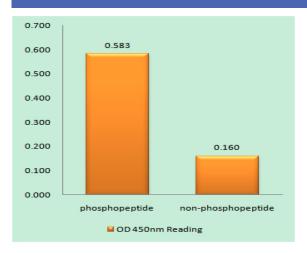

Subcellular Cell membrane ; Single-pass type I membrane protein .

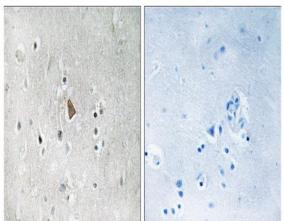

Empatismion:

Found as a hybrid receptor with INSR in muscle, heart, kidney, adipose tissue, skeletal muscle, hepatoma, fibroblasts, spleen and placenta (at protein level). Expressed in a variety of tissues. Overexpressed in tumors, including melanomas, cancers of the colon, pancreas prostate and kidney.
