

CD31 (PN0626) Nb-FC recombinant antibody

Catalog No :	YA0275
Reactivity :	Human
Applications :	FCM;ELISA
Target :	CD31
Gene Name :	PECAM1
Protein Name :	Platelet endothelial cell adhesion molecule (PECAM-1) (EndoCAM) (GPIIA') (PECA1) (CD antigen CD31)
Human Gene Id :	5175
Human Swiss Prot	P16284
No : Immunogen :	Purified recombinant Human CD31
Specificity :	This recombinant monoclonal antibody can detects endogenous levels of CD31 protein.
Specificity : Formulation :	
	protein.
Formulation :	protein. Phosphate-buffered solution Camel, chimeric fusion of Nanobody (VHH) and mouse IgG1 Fc domain ,
Formulation : Source :	protein. Phosphate-buffered solution Camel, chimeric fusion of Nanobody (VHH) and mouse IgG1 Fc domain , recombinantly produced from 293F cell
Formulation : Source : Dilution :	protein. Phosphate-buffered solution Camel, chimeric fusion of Nanobody (VHH) and mouse IgG1 Fc domain , recombinantly produced from 293F cell ELISA 1:5000-100000;FCM 1-2µg/Test
Formulation : Source : Dilution : Purification :	protein. Phosphate-buffered solution Camel, chimeric fusion of Nanobody (VHH) and mouse IgG1 Fc domain , recombinantly produced from 293F cell ELISA 1:5000-100000;FCM 1-2µg/Test Recombinant Expression and Affinity purified
Formulation : Source : Dilution : Purification : Concentration :	protein. Phosphate-buffered solution Camel, chimeric fusion of Nanobody (VHH) and mouse IgG1 Fc domain , recombinantly produced from 293F cell ELISA 1:5000-100000;FCM 1-2µg/Test Recombinant Expression and Affinity purified Please check the information on the tube

	monocytes, neutrophils, and some types of T-cells, and makes up a large portion of endothelial cell intercellular junctions. The encoded protein is a member of the immunoglobulin superfamily and is likely involved in leukocyte migration, angiogenesis, and integrin activation. [provided by RefSeq, May 2010]
Function :	This protein is a cell adhesion molecule expressed on platelets and at endothelial cell intercellular junctions.,online information:CD31 entry,online information:PECAM-1,online information:The Singapore human mutation and polymorphism database,PTM:Phosphorylated on Ser and Tyr residues after cellular activation.,similarity:Contains 6 Ig-like C2-type (immunoglobulin-like) domains.,tissue specificity:Long isoform predominates all tissues examined, isoform Delta12 was detected only in trachea and isoform Delta14-15 only in lung, isoform Delta14 was detected in all tissues examined with the strongest expression in heart.,
Subcellular Location :	Cell membrane ; Single-pass type I membrane protein . Cell surface expression on neutrophils is down-regulated upon fMLP or CXCL8/IL8-mediated stimulation. .; [Isoform Long]: Cell membrane ; Single-pass type I membrane protein . Membrane raft . Cell junction . Localizes to the lateral border recycling compartment (LBRC) and recycles from the LBRC to the junction in resting endothelial cells; [Isoform Delta15]: Cell junction . Localizes to the lateral border recycling compartment (LBRC) and recycles from the LBRC to the junction in resting endothelial cells.
Expression :	Expressed on platelets and leukocytes and is primarily concentrated at the borders between endothelial cells (PubMed:18388311, PubMed:21464369). Expressed in human umbilical vein endothelial cells (HUVECs) (at protein level) (PubMed:19342684, PubMed:175838). Expressed on neutrophils (at protein level) (PubMed:175838). Isoform Long predominates in all tissues examined (PubMed:12433657). Isoform Delta12 is detected only in trachea (PubMed:12433657). Isoform Delta14-15 is only detected in lung (PubMed:12433657). Isoform Delta14 is detected in all tissues examined with the strongest expression in heart (PubMed:12433657). Isoform Delta15 is expressed in brain, testis, ovary, cell surface of platelets, human umbilical vein endothelial cells (HUVECs), Jurkat T-cell leukemia, human erythroleukemia
