

## TNF-a (PN0466) Nb-FC recombinant antibody

Catalog No: YA0647

Reactivity: Human

**Applications:** ELISA

Target: TNFa

**Fields:** >>Antifolate resistance;>>MAPK signaling pathway;>>Cytokine-cytokine

receptor interaction;>>Viral protein interaction with cytokine and cytokine

 $receptor; >> NF-kappa \ B \ signaling \ pathway; >> Sphingolipid \ signaling$ 

pathway;>>mTOR signaling pathway;>>Apoptosis;>>Necroptosis;>>TGF-beta signaling pathway;>>Osteoclast differentiation;>>Antigen processing and presentation;>>Toll-like receptor signaling pathway;>>NOD-like receptor signaling pathway;>>C-type lectin receptor signaling pathway;>>Hematopoietic cell lineage;>>Natural killer cell mediated cytotoxicity;>>IL-17 signaling pathway;>>T cell receptor signaling

pathway;>>Fc epsilon RI signaling pathway;>>TNF signaling pathway;>>Adipocytokine signaling pathway;>>Type II diabetes

mellitus;>>Insulin resistance;>>Non-alcoholic fatty liver disease;>>AGE-RAGE signaling pathway in diabetic complications;>>Alcoholic liver disease;>>Type I diabetes mellitus;>>Alzheimer disease;>>Amyotrophic lateral sclerosis;>>P

Gene Name: TNF TNFA TNFSF2

Protein Name: Tumor necrosis factor (Cachectin) (TNF-alpha) (Tumor necrosis factor ligand

superfamily member 2) (TNF-a) [Cleaved into: Tumor necrosis factor, membrane

form (N-terminal fragment) (NTF); Intracellular

Human Gene Id: 7124

**Human Swiss Prot** P01375

No:

Immunogen:

Purified recombinant Human TNFa

**Specificity:** This recombinant monoclonal antibody can detects endogenous levels of TNFa

protein.

Formulation : Phosphate-buffered solution

1/2

Source: Camel, chimeric fusion of Nanobody (VHH) and mouse IgG1 Fc domain,

recombinantly produced from 293F cell

**Dilution:** ELISA 1:5000-100000

**Purification:** Recombinant Expression and Affinity purified

**Concentration:** Please check the information on the tube

Storage Stability: -15°C to -25°C/1 year(Avoid freeze / thaw cycles)

**Cell Pathway:** MAPK\_ERK\_Growth;MAPK\_G\_Protein;Cytokine-cytokine receptor interaction;A

poptosis\_Inhibition;Apoptosis\_Mitochondrial;Apoptosis\_Overview;TGF-

beta;Toll\_Like;NOD-like receptor;RIG-I-like receptor;Hematopoi

**Background:** This gene encodes a multifunctional proinflammatory cytokine that belongs to

the tumor necrosis factor (TNF) superfamily. This cytokine is mainly secreted by

macrophages. It can bind to, and thus functions through its receptors

TNFRSF1A/TNFR1 and TNFRSF1B/TNFBR. This cytokine is involved in the regulation of a wide spectrum of biological processes including cell proliferation, differentiation, apoptosis, lipid metabolism, and coagulation. This cytokine has been implicated in a variety of diseases, including autoimmune diseases, insulin

resistance, and cancer. Knockout studies in mice also suggested the neuroprotective function of this cytokine. [provided by RefSeq, Jul 2008],

**Function:** disease: Cachexia accompanies a variety of diseases, including cancer and

infection, and is characterized by general ill health and

malnutrition., disease: Genetic variations in TNF are associated with susceptibility to hepatitis B virus infection (HBV infection) [MIM:610424]. Approximately one third of all cases of cirrhosis and half of all cases of hepatocellular carcinoma can be attributed to chronic HBV infection. HBV infection may result in subclinical or asymptomatic infection, acute self-limited hepatitis, or fulminant hepatitis requiring liver transplantation., disease: Genetic variations in TNF are associated with susceptibility to psoriatic arthritis [MIM:607507]. Psoriasis is a chronic inflammatory dermatosis that affects approximately 2% of the population. It is characterized by red, scaly skin lesions that are usually found on the scalp,

elbows, and knees, and may be associated w

Subcellular Location:

Cell membrane; Single-pass type II membrane protein.; [Tumor necrosis factor, membrane form]: Membrane; Single-pass type II membrane protein.; [Tumor necrosis factor, soluble form]: Secreted.; [C-domain 1]: Secreted.; [C-domain 2]: Secreted.
