

CD31 mouse mAb

YM1375 Catalog No:

Reactivity: Human

Applications: WB;IP

Target: CD31

Fields: >>Cell adhesion molecules;>>Leukocyte transendothelial

migration;>>Malaria;>>Fluid shear stress and atherosclerosis

Gene Name: pecam1

Human Gene Id: 18613

Human Swiss Prot

No:

Mouse Swiss Prot

No:

Purified recombinant human CD31 protein fragments expressed in E.coli. Immunogen:

This antibody detects endogenous levels of CD31 and does not cross-react with **Specificity:**

related proteins.

P16284

Q08481

Formulation: Liquid in PBS containing 50% glycerol, 0.5% BSA and 0.02% sodium azide.

Source: Monoclonal, Mouse

Dilution: wb dilution 1:1000

The antibody was affinity-purified from mouse ascites by affinity-**Purification:**

chromatography using epitope-specific immunogen.

Concentration: 1 mg/ml

Storage Stability: -15°C to -25°C/1 year(Do not lower than -25°C)

Observed Band: 130kD

1/3

Cell Pathway:

Cell adhesion molecules (CAMs);Leukocyte transendothelial migration;

Background:

The protein encoded by this gene is found on the surface of platelets, monocytes, neutrophils, and some types of T-cells, and makes up a large portion of endothelial cell intercellular junctions. The encoded protein is a member of the immunoglobulin superfamily and is likely involved in leukocyte migration, angiogenesis, and integrin activation. [provided by RefSeq, May 2010],

Function:

function:This protein is a cell adhesion molecule expressed on platelets and at endothelial cell intercellular junctions.,online information:CD31 entry,online information:PECAM-1,online information:The Singapore human mutation and polymorphism database,PTM:Phosphorylated on Ser and Tyr residues after cellular activation.,similarity:Contains 6 lg-like C2-type (immunoglobulin-like) domains.,tissue specificity:Long isoform predominates all tissues examined, isoform Delta12 was detected only in trachea and isoform Delta14-15 only in lung, isoform Delta14 was detected in all tissues examined with the strongest expression in heart.,

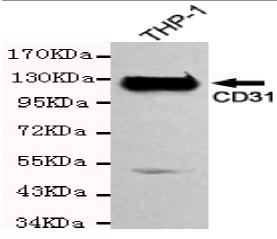

Subcellular Location :

Cell membrane; Single-pass type I membrane protein. Cell surface expression on neutrophils is down-regulated upon fMLP or CXCL8/IL8-mediated stimulation. .; [Isoform Long]: Cell membrane; Single-pass type I membrane protein. Membrane raft. Cell junction. Localizes to the lateral border recycling compartment (LBRC) and recycles from the LBRC to the junction in resting endothelial cells. .; [Isoform Delta15]: Cell junction. Localizes to the lateral border recycling compartment (LBRC) and recycles from the LBRC to the junction in resting endothelial cells.

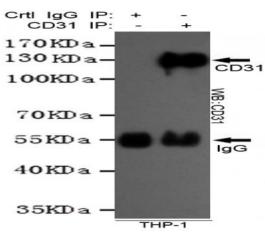

Expression:

Expressed on platelets and leukocytes and is primarily concentrated at the borders between endothelial cells (PubMed:18388311, PubMed:21464369). Expressed in human umbilical vein endothelial cells (HUVECs) (at protein level) (PubMed:19342684, PubMed:17580308). Expressed on neutrophils (at protein level) (PubMed:17580308). Isoform Long predominates in all tissues examined (PubMed:12433657). Isoform Delta12 is detected only in trachea (PubMed:12433657). Isoform Delta14-15 is only detected in lung (PubMed:12433657). Isoform Delta14 is detected in all tissues examined with the strongest expression in heart (PubMed:12433657). Isoform Delta15 is expressed in brain, testis, ovary, cell surface of platelets, human umbilical vein endothelial cells (HUVECs), Jurkat T-cell leukemia, human erythroleuk

Products Images

Western blot detection of CD31 in THP-1 cell lysate using CD31 mouse mAb (1:1000 diluted).Predicted band size: 130KDa.Observed band size: 130KDa.

Immunoprecipitation analysis of THP-1 cell lysates using CD31 mouse mAb.
