

## RFP-Tag Monoclonal Antibody(5G4), HRP Conjugated

|                            |                                                                                                                                                                                                          |
|----------------------------|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <b>Catalog No :</b>        | YM2141                                                                                                                                                                                                   |
| <b>Reactivity :</b>        | Species independent                                                                                                                                                                                      |
| <b>Applications :</b>      | WB                                                                                                                                                                                                       |
| <b>Target :</b>            | RFP-Tag                                                                                                                                                                                                  |
| <b>Specificity :</b>       | RFP-Tag Monoclonal Antibody(5G4) HRP Conjugated, specially designed for your Western blot analysis.                                                                                                      |
| <b>Formulation :</b>       | Liquid in PBS, pH 7.4, containing 0.02% sodium azide as preservative and 50% Glycerol.                                                                                                                   |
| <b>Source :</b>            | Monoclonal, Mouse IgG                                                                                                                                                                                    |
| <b>Dilution :</b>          | Optimal working dilutions should be determined experimentally by the investigator. Suggested starting dilutions are as follows: WB 1:5000.                                                               |
| <b>Purification :</b>      | The antibody was affinity-purified from mouse ascites by affinity-chromatography using specific immunogen.                                                                                               |
| <b>Concentration :</b>     | 1mg/ml                                                                                                                                                                                                   |
| <b>Storage Stability :</b> | Stable for one year at -15°C to -25°C from date of shipment. For maximum recovery of product, centrifuge the original vial after thawing and prior to removing the cap. Aliquot to avoid repeated freezi |
