

HSP60 protein

Catalog No: YD0044

Reactivity: Human

Applications: WB;SDS-PAGE

Gene Name: HSPD1

Protein Name: HSP60 protein

Sequence: Amino acid: 305-426, with his-MBP tag.

P10809

P63038

Human Gene ld: 3329

Human Swiss Prot

No:

Mouse Swiss Prot

No:

Formulation: Liquid in PBS

Source: E.coli

Dilution : WB 1:500-2000

Concentration: SDS-PAGE >90%

Storage Stability: -20°C/6 month,-80°C for long storage

Background: disease:Defects in HSPD1 are a cause of spastic paraplegia autosomal

dominant type 13 (SPG13) [MIM:605280]. Spastic paraplegia is a degenerative spinal cord disorder characterized by a slow, gradual, progressive weakness and spasticity of the lower limbs., disease: Defects in HSPD1 are the cause of

mitochondrial HSP60 chaperonopathy or MitCHAP-60 disease. HLD4 is a severe autosomal recessive hypomyelinating leukodystrophy. Clinically characterized by infantile-onset rotary nystagmus, progressive spastic paraplegia, neurologic regression, motor impairment, profound mental retardation. Death usually occurrs

within the first 2 decades of life.,function:Implicated in mitochondrial protein import and macromolecular assembly. May facilitate the correct folding of

leukodystrophy hypomyelinating type 4 (HLD4) [MIM:612233]; also called

1/2

imported proteins. May also prevent misfolding and promote the refolding and proper assembly of unfolded polypeptides generated under stress conditions in the mitochondrial matrix.,similarity:Belongs to the chaperonin (HSP60) family.,similarity:Belongs to the TCP-1 chaperonin family.,subunit:Interacts with HBV protein X and HTLV-1 protein p40tax.,

Function:

cell activation, cytokine production, regulation of cytokine production, positive regulation of cytokine production, somatic diversification of immune receptors, somatic recombination of immunoglobulin genes during immune response, somatic diversification of immunoglobulins during immune response, activation of innate immune response, pattern recognition receptor signaling pathway, toll-like receptor signaling pathway, adaptive immune response, immune effector process, activation of immune response, cytokine production during immune response, B cell cytokine production, immunoglobulin production, immunoglobulin production during immune response, production of molecular mediator of immune response, leukocyte mediated immunity, lymphocyte mediated immunity, adaptive immune response based on somatic recombination of immune receptors built from immunoglobulin superfamily domains, immune system

Subcellular Location:

Mitochondrion matrix.
